

Test Date Plausibility Check – Calendar Overview

Figure 1. Calendar heatmap of test days

Tile border marks days falling on a weekend, school holiday, or public holiday.

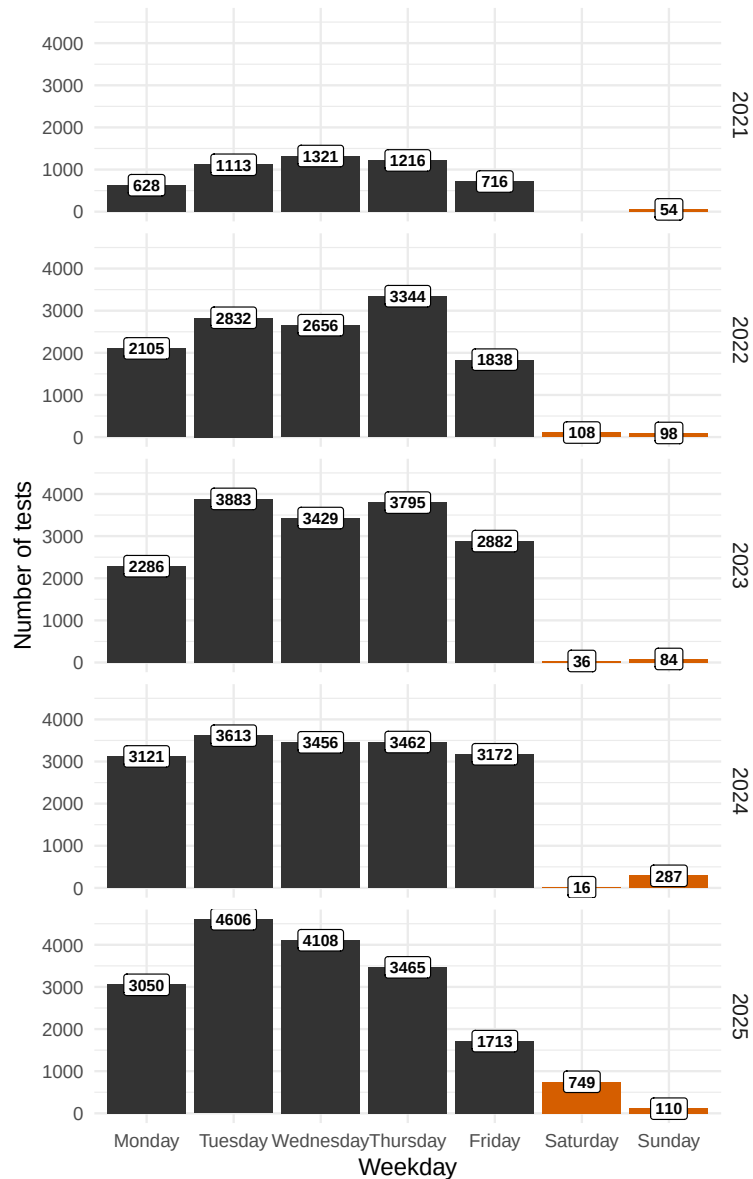

All test days with full day-level precision (Y-m-d), arranged by ISO week and weekday. Borders identify weekends, Thuringian school holidays, and the fixed public holidays considered: World Children's Day, German Unity Day, and Reformation Day.

Test Date Plausibility Check – Weekday Pattern and Resolved Precision

Figure 2. Test days by weekday

Red bars represent weekend test days: implausible dates downgraded to year–month precision.

Tests should not have been not conducted on weekends. Red bars identify implausible day–level test dates retained only at year–month precision after the plausibility check.

Table 1. Resolved test date precision by school year (n, % of year)

School year	Y	Y–m	Y–m–d
2021	36 (1%)	119 (2%)	5751 (97%)
2022	20 (0%)	294 (2%)	12501 (98%)
2023	15 (0%)	149 (1%)	15610 (99%)
2024	0	404 (2%)	16723 (98%)
2025	23 (0%)	912 (5%)	16889 (95%)

Y–m–d = plausible full date retained. Y–m = the original day–level date was implausible because it fell on a weekend, school holiday, or public holiday; its precision was downgraded to year–month.

Table 2. Correction reasons and test–date precision before and after correction

Change reason	Original precision	Resolved precision	Cases
File modify date: 2023–01–15, school year known	Y	Y	20
change date from 2021–01–15 to 2022–01–15, File modify date: 2022–02–28, school year known; testdate on weekend	Y–m–d	Y–m	20
changed from 2022–01–01 to 2022–12–01 as in 10148_GS_Wintersdorf_3b.xlsx	Y–m–d	Y–m–d	18
changed from 2022–12–18 to 2024–12–18, school year known	Y–m–d	Y–m–d	15
changed from 2023–11–23 to 2022–11–23, school year known	Y–m–d	Y–m–d	17
only month missing, day and year as in 14429_GS_Bad_Lobenstein_3b.xlsx	Y–m–d	Y–m–d	23
school year 2021/22 known, File modify date: 2021–12–16	Y	Y	36
testdate on weekend	Y–m–d	Y–m	1522
testdate within school holiday	Y–m–d	Y–m	336
No recorded correction reason	Y	Y	38
No recorded correction reason	Y–m–d	Y–m–d	67401

The table records every distinct correction reason and documents traceability from the raw test date to the cleaned date precision used in analysis.
